Unveiling the Importance of Eliminating Biofilm

INTRODUCTION

Biofilm: The Invisible Menace

Biofilm is a stubborn and often unnoticed layer of microorganisms that can cling to surfaces, lurking in places we least expect. VIRO 100 have been exploring why eradicating biofilm is not just a choice, but a necessity for health, safety, and cleanliness.

THE HIDDEN DANGERS

Microbial Havens: Biofilms provide a safe haven for harmful bacteria, viruses, and fungi to thrive. These microorganisms can pose serious health risks to humans, animals, and even plants.

Infection Hotspots: Biofilm on medical equipment or implants can lead to infections that are hard to treat. Prevention is key to ensuring patient safety and successful medical procedures.

THE POWER OF PREVENTION

Hygiene & Aesthetics: Biofilm buildup compromises hygiene and detracts from the aesthetic appeal of surfaces. Regular cleaning helps maintain a clean and attractive environment.

Equipment Longevity: Biofilm corrodes surfaces, reducing the lifespan of equipment. Keeping surfaces clean and free of biofilm extends the life of machinery.

BIOFILM'S IMPACT

Water Quality: In water systems, biofilm can degrade water quality and cause clogs. Cleaning prevents buildup, ensuring safe and clean water delivery.

Efficiency Enhancement: Biofilm on equipment hampers their efficiency by obstructing heat exchange and fluid flow. Regular cleaning maintains optimal equipment performance.

REGULATIONS & COMPLIANCE -

Industry Standards: Many industries have regulations that mandate regular biofilm cleaning to prevent issues and ensure safety. Compliance is crucial for avoiding legal repercussions.

Healthcare: Medical facilities are held to stringent standards. Eradicating biofilm is essential to maintain sterile environments and safeguard patient well-being.

TAKING ACTION -

Chemical Solutions: Viro 100 is effective in breaking down biofilm matrix and eliminating microorganisms.

Physical Agitation: With Viro 100 special cleaning formula and exclusive technology you do not have to clean as hard, you only have to clean smart.

THE ULTIMATE GOAL -

The ultimate goal of biofilm eradication is to create a healthier, safer, and more efficient environment. By diligently cleaning surfaces and equipment with Viro 100, we can:

- Prevent infections and illnesses
- Improve aesthetics and hygiene

- Prolong equipment life
- Enhance water quality

- Ensure compliance with regulations

join the fight against biofilm!

Embrace the importance of biofilm elimination and take proactive steps to create a cleaner and safer world with Viro 100 for Healthcare and V100 for all your Janatorial needs. We have a full range of wipes and liquids to help you start the journey. By eradicating biofilm, we contribute to healthier lives and a more sustainable future.

Disinfecting Wipes, Mist Spray & Concentrate

Disinfects General Bacteria in 30 Seconds

	Germ Kill	Area	Log Reduction
BS EN 1276	99.999%	Bactericidal General	5 log reduction
BS EN 13624	99.99%	Fungicidal Yeasticidal Medical	4 log reduction
BS EN 13697	99.99%	Bactericidal General	4 log reduction
BS EN 13727	99.999%	Bactericidal Medical	5 log reduction
BS EN 14476	99.99%	Virucidal Medical	4 log reduction
BS EN 1500	99.9%	Hygienic Hand Rub min. 18 participants	3 log reduction
BS EN 1650	99.99%	Fungicidal Yeasticidal General	4 log reduction
BS EN 16615	99.999%	Wipes Medical	5 log reduction
ISO 15883	99.999998%	Medical Biofilm Removal	7 log reduction
ISO 15883	100%	Endoscope Bio film pre clean	8 log reduction

deep clean & disinfect wipes, spray & concentrate

Eliminates 100% Biofilm Disinfects General Bacteria in 30 Seconds

Kills 100%

of Germs
